

Ground Sleeves for Traffic Equipment

Features:

- These ground sleeves are produced of fire retardant resin and a combination of chopped glass spray-up and hand lay-up using 18 oz. woven roving glass reinforcement.
- The exterior is covered with a Mist Gray (Concrete Color) gel-coat, which contains UV stabilizer for superior weatherability.
- Stainless Steel floating nut inserts can be installed to match traffic control bolting patterns for an additional cost.
- The GST-90-48-5 features a large surface walking surface around the raised mounting area for the control for ease of access.
- Other gel-coat colors available.
- Please see our Cabinet Cross Reference Chart to the left. Common traffic signal cabinets are listed with the Nordic ground sleeve that will accommodate it.
