Joint Trench Pedestals Features:

- Nordic Fiberglass joint trench pedestals are designed to bring underground cables for electricity, communications, and cable television together to one service area. The attractive exterior and orderly arrangement of these pedestals will be greatly appreciated by homeowners.
- A variety of combinations are available to suit each application.
- Pedestals produced of compression molded fiberglass are fire-retardant, the PSP-151530-MG is not fire-retardant.
- The green pigment is permanently molded into the pedestals and cannot peel, rust, or corrode.
- Munsell green or willow green color is available.
- "ELECTRIC" is imprinted on the top in raised lettering.
- The communications and cable television pedestals are secured to the electric pedestal with a fiberglass channel.
- The flange around the bottom perimeter of the base of the electric pedestal or stake provides excellent stability.
